

POLYMER BODY DRILL - 1/2" K/LESS CHUCK

Brand: **Stid**

Product Code: **BM3E**

POLYMER BODY DRILL - 1/2" K/LESS CHUCK

1/2" Lightweight Polymer Housing Reversible Drill is suitable for underground mining applications. This was the first polymer housing drill on the market and is still the best!

The body of the drill provides protection against the "chill factor" common with air tools, and its properties also provide vibration protection as well. The tool has a very powerful gear reduction system, making it the logical choice when you are looking for a drill with plenty of power for those difficult jobs. The 400rpm stands out from the crowd coupled with its lightweight and durability; you cannot go past this drill.

- * Suitable for underground mining and hazardous environments
- * Keyless chuck as standard
- * Lightweight polymer housing
- * Quiet handle exhaust
- * Comfortable grip handle
- * Optional silencer assembly to further reduce exhaust noise

When you purchase the tool it comes with a basic service kit included, adding great value!
