

TUNGSTEN CARBIDE ENGRAVER

Brand: **Gatx**

Product Code: **GP-0580**

TUNGSTEN CARBIDE ENGRAVER

Heavy duty tungsten carbide tip engraver. This is an invaluable tool to have, it can engrave on most surfaces easily, allowing you to engrave your product codes, name or other distinctive markings - a great theft deterrent!

Because the tip vibrates back and forth, this tool is safer than standard rotational engravers that use burrs - an important OH&S feature!

Optional Fine (Part# P058016), Medium (Part# P058017) and Course (Part# P058018) tips are available if required.
