6.0mm HYDROPNEUMATIC RIVETER

This is an Industrial Hydropneumatic tool with vacuum mandrel extraction for blind rivets and structural high performance Farbolt rivets and similar. Lightweight and ergonomic, it is equipped with a joint for compressed air on both sides.

This solid reliable tool features a double acting hydro-pneumatic actuation resulting in a quick cycle time while maintaining a high traction force. It also features vacuum mandrel extraction as well as a mandrel container at the rear for spent mandrels.

Standard rivets \varnothing 6mm only in aluminium.

The riveting tool can be used for high performances FarBolt rivets and similar, by assembling the KIT part no. 74000090.

The riveting tool is also suitable for X/S Trifar high performance rivets, by assembling the nozzle part no. 71345652.

Replaces the previous model RAC181.
