

INDUSTRIAL CHIPPING HAMMER (HEX)

Brand: **Toku**

Product Code: **THA4S (H)**

INDUSTRIAL CHIPPING HAMMER (HEX)

Industrial 102mm stroke chipping hammer has the power for the hardest of applications
- Made in Japan.

This product is a favourite with mining, construction and concrete repair/maintenance companies. In particular the tool is used with excellent results in the repair and maintenance of bowls on concrete trucks, because it has the power "to get the job done".

We promote this tool with a solid spring retainer system as we have found over the past 37 years that this retainer system provides some anti-vibration benefits, lasts longer and is much cheaper to replace than other retainer systems on the market.

The tool has replaceable front head bushings, and this feature ensures the owner/operator of a longer service life, making sure you get full benefit out of this tool.

As with all of our industrial products, we offer technical and spare parts support to ensure your investment in our imported product(s) is a wise one.
